CheckPast - ESS

An Employee screening system , allows different agencies to make background checks on their employees , it goes through several stages and provides reports in terms of Graphical Chart representation and data as well.

Project Challenges :

- User Friendly UI using RAD controls
- Managing and Migration of old database to the new one. Huge data migration contains millions of records from Taleo.
- Scalable and Robust system as it will be used by back end teams of different organizations, so optimization for concurrency was a challenge and delivered very well.

Larry Talley ,CEO– Brand Tango.
Zonixsoft has been a huge asset to our company saving us time and money. Proving that with the right agency offshore development is the way to go! Thanks Zonixsoft

★★★★★ This company is great! Unlike other software development companies, Zonixsoft is professional and proficient, developing quality software at a reasonable price, quickly. I simply provided a wire-frame and they did the rest. And, it's not right, they fix it.

1

Larry Brister
a week ago

★★★★★ As a Senior Developer I have worked with many outsourced teams over the years. Zonixsoft rates at the very top in professionalism, productivity and precision of application development. I have no reservations at all in recommending this great team to others.

1

Stephen Quenzer
in the last week -

★★★★★ Our company has been working with Kanav and Zonixsoft for over two years now, and I would happily recommend their services. They are experienced, responsive, and are eager to work closely with their clients to develop results that exceed expectations. We plan to work with them again in the future.
